This excellent evergreen is probably the hardiest of all the Yews. In our nursery, where the temperature sometimes reaches 15 degrees below zero, there is never any sign of winter damage among them. The mature foliage is a deep lustrous green and retains this color throughout the winter, making a striking contrast with the snow. The growth is sturdy, erect and compact. Fine for evergreen hedges, mass plantings, specimen plants or foundation plantings.

Heavy 1½ to 2 ft. size B & B	\$2.50 each
Heavy 2 to 2½ ft. size B & B	3.10 each

RED BUD or JUDAS TREE (*Cercis canadensis*)

No home planting is complete, without at least one of these attractive low-growing trees. The exquisite pink, sweet pea shaped blossoms are borne in abundance on the slender, graceful dark brown twigs and are followed by large, heart-shaped, lush green foliage which has a reddish tip when first opening. The trees are hardy, the bloom reliable and few diseases affect them. You will surely wish to order several at these attractive prices:

FOR A *Complete Garden*

★ Note instructions on enclosed order blank.

ATTENTION, AMERICANS!

It is our desire to co-operate with the Government's policy toward the stabilization of prices. This necessitates some sacrifices, one of which is the elimination of our usual Fall Garden Book.

In this folder we are listing some of our special offerings, and for ordering any other material not listed, please use the prices listed in our Spring Garden Book.

You probably recognize the fact that all of our costs have gone up materially. It is our desire and duty to keep our prices to our customers as low as possible. By cutting several corners without reducing the quality of our merchandise, we have been able to do this. We are passing on to you the benefit of these lower prices.

We are sure that the quality of our merchandise and our efforts in this National Emergency will warrant your confidence and co-operation.

STORRS & HARRISON, INC.

MOUNTAIN ASH (*Sorbus aucuparia*)

From winter's gaunt, picturesque limbs break forth many delicate fern-like leaves. To these leaves are added clusters of attractive small, white flowers. It would seem that this is all we could expect from one tree but nature culminates the display with many clusters of fiery, orange berries which cling to the twigs long after the leaves have fallen. A tree that gives much and asks little in the way of soil or water.

Prices this fall only:

4 to 5 feet.....\$1.40 each
5 to 6 feet..... 1.95 each
6 to 8 feet..... 2.40 each

Sent express or freight collect.

BITTERSWEET

(*Celastrus orbiculatus*) (orange berries) (Celastrus scandens) (red berries)

It almost seems a waste of effort to try to describe these universally known vines. Who is there who has not seen their gnarly, twisting vines gracing some ancient fence corner or festooning an aged stump. Their gorgeous berries have furnished winter decoration for our homes for many years.

Large 3-year plants, each \$0.40; 3 for \$1.10. Sent prepaid.
